

METALOUMIN
ALUMINIUM SYSTEMS SINCE 1969

Custom Profiles & Advanced Systems

**We transform your ideas into
products**

Saint Fanouriou 20 str., 136 78, Acharnes, Attika, GREECE

tel.: +30 210 2463630, Website: www.metaloumin.gr, E-mail: export@metaloumin.gr

Our product range cover the market segments:

- Awnings & Pergola elements
- Balustrade systems
- Bathroom furniture
- Business refrigeration
- Construction industries
- Curtain & Blinds/ shadings
- Curtain rods
- Decking
- Electrical goods
- Fencing systems
- Furniture
- Heaters
- Hoods
- Inscriptions- Signs
- Green houses
- Garden & Outdoor
- Glass railings
- Gutter systems
- Internal architectural fittings
- Kitchen furniture
- LED & Lighting
- Marine/ Naval equipment
- Medical equipment
- Road signs
- Shop equipment
- Stairs & Ladders
- Solar thermal panel frames
- Solar thermal panel mountings
- Vehicle industries
- Umbrellas

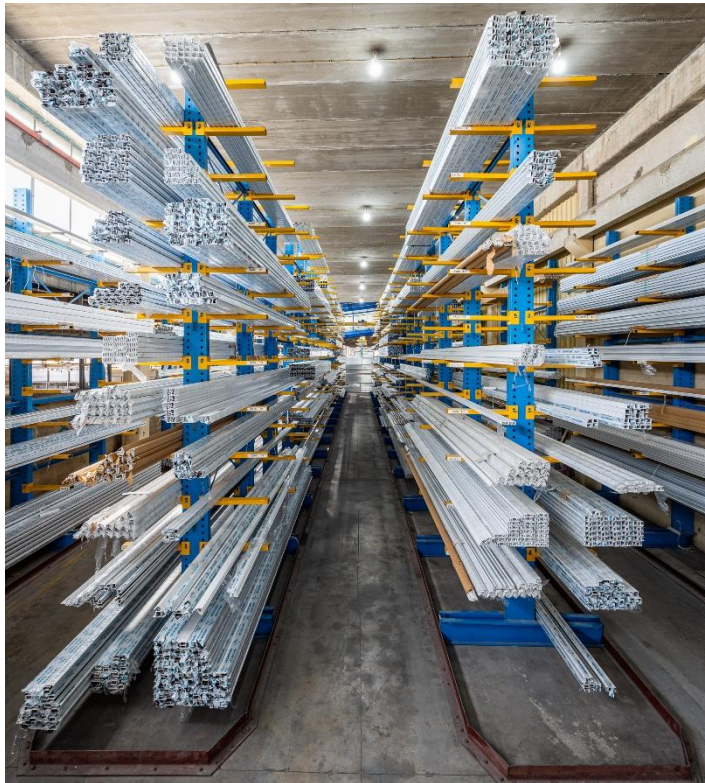

METALOUMIN
ALUMINIUM SYSTEMS SINCE 1969

Want to design and construct a new product?

Want profiles with?

- **Various dimensions**
- **Special manufacturing requirements**
- **Processing**
- **Powder coating**
- **Anodization effect**

Who we are

Metaloumin S.A. is an aluminium extrusion company based in Greece, established in 1969. The company produces patented architectural profile systems for doors and windows, as well as a wide range of custom aluminium profiles tailored to specific applications, including greenhouses, decking, architectural fittings, LED and lighting fixtures, balustrades, and railings. Since 2009, Metaloumin has also been active in the renewable energy sector, offering photovoltaic mounting systems and single-axis trackers for all types of installations.

Metaloumin operates a fully integrated, in-house production process, starting from aluminium raw material and delivering complete, ready-to-install systems. Its dedicated Engineering and Static Studies department has developed a wide variety of geometries and designs aligned with current market trends and customer requirements, serving both standard and custom applications.

The company's experienced R&D department continuously develops new products and accessories, expanding the portfolio and adapting to evolving market needs. Additionally, the Processing department (cutting, drilling, and welding to specification) offers a complete one-stop-shop solution.

Outstanding logistics and after-sales services ensure reliable delivery and long-term support, fostering strong and lasting partnerships with its clients.

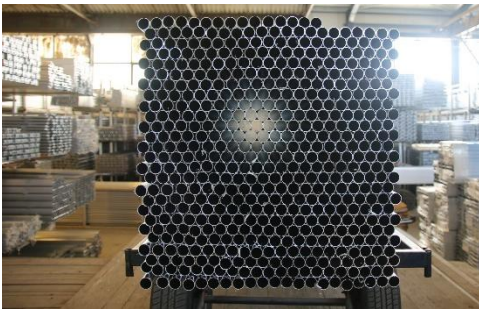

METALOUMIN
ALUMINIUM SYSTEMS SINCE 1969

What we offer to our Partners

Vertical, in-house production from raw aluminum to complete system.

- Profiles constructed from multiple alloys of high resistances/ strengths and with various dimensions.
- Customized software for the design of products with special intersections and requirements.
- Agility to offer and create new products.
- Large variety of designs covering custom and contemporary markets.
- Ability to manufacture profiles of special requirements in terms of tolerances and piercing.
- R & D department dedicated to custom constructions with the ability to construct and supply corresponding accessories from aluminum, plastic and steel material.

We cannot know in advance what you have in mind, but we can guarantee that your ideal solution exists, and you can find it here.

Our engineering department is available to interact in view of developing your idea to a sample 3D design for your approval and final production.
